Another Milestone!

CHICAGO - Dec. 16, 2003

AvTurf Announces Another Milestone

AvTurf®, the patented artificial turf for airports, is celebrating its three year anniversary of the first installed aviation synthetic grass at Midway International Airport in Chicago. **AvTurf®** has exceeded all expectations. Since its inception, the product has undergone rigorous testing at four major airports as well as the F.A.A. and independent sites.

"Every installation has paid for itself in maintenance cost savings and man hours," said Pat Carr, President of **AvTurf®**. Unlike **AvTurf®** imitations that have surfaced which have little or no aviation experience, **AvTurf®** offers the most durable product in the market which no one else can legitimately claim.
