## AvTurf® Testing in Toronto 100% Successful

CHICAGO - Nov. 8, 2002

On October 1, 2002, In cooperation with the Greater Toronto Airport Authority, The University of Toronto and **AvTurf L.L.C.** A section of **AvTurf®** was successfully implemented at Lester B. Pearson International Airport in Toronto along Runway 15L/33R and SW radius of November taxiway.

Since its installation, it has gone through hundreds of takeoffs and landings with outstanding results. On November 5 - 7, 2002, the **AvTurf®** product was subject to durability testing as it relates to: Fire Resistance, Heavy maintenance and snow removal equipment, ARFF Vehicles and Aircraft Jet Blast and Aircraft engine pass-over. The results were 100% successful.

A program has been set up with GTAA and **AvTurf®** for further observations and testing with the results to be published when complete.
